

Big Data Analytics MID IMP (Chapter 1-6)

No.	Question	Chapter	Frequency
1	What is Big Data? Explain different types of Big Data.	1	4
2	List / discuss characteristics of Big Data.	1	2
3	Difference between Traditional Data vs Big Data Business Approach.	1	2
4	Structured vs Unstructured vs Semi-Structured Data.	1	3
5	What is Big Data? (Volume & Velocity discussion)	1	1
6	Explain Challenges of Big Data.	1	1
7	Explain drivers of Big Data.	1	1
8	Applications of Big Data Analytics in sectors.	1	1
9	What is Stream Data / Data-Stream Management System.	2	2
10	Count-Distinct Problem.	2	2
11	General Sampling Problem.	2	1
12	Bloom Filter with working.	2	2
13	Flajolet-Martin Algorithm.	2	3
14	DGIM Algorithm.	2	5
15	Sampling Methods for Streams.	2	1
16	Examples of Stream Data Sources.	2	1
17	Discriminant Analysis vs Cluster Analysis.	3	3
18	Dimensionality Reduction technique.	3	1
19	Linear Discriminant Analysis (LDA steps).	3	1
20	Social Media Mining.	3	1
21	Pig, Hive, MongoDB definitions.	3	1
22	PageRank Algorithm.	4	5
23	Link Spam / Hubs / Authorities / Spam Farm.	4	2
24	Multistage Algorithm.	5	4
25	Multihash Algorithm.	5	3
26	Market Basket Analysis.	5	2
27	SON Algorithm (Frequent Items in Stream).	5	1
28	Park–Chen–Yu Algorithm.	5	1
29	Social Network as Graph.	6	1
30	SimRank Algorithm.	6	1
31	Clustering of Social-Network Graphs.	6	1
